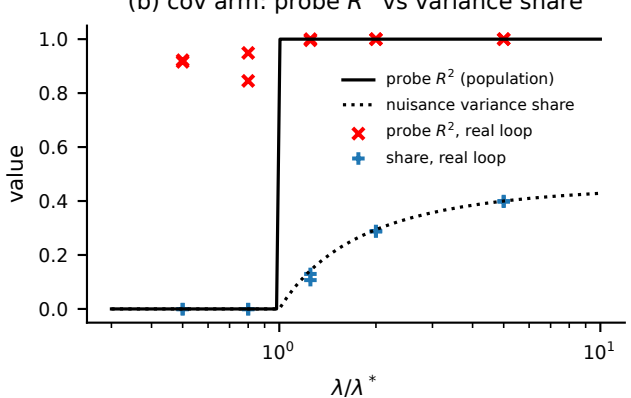
(a) nuisance variance above the threshold
nuisance variance per direction
cov, Thm 1: $1-\lambda^*/\lambda$
cov (population, numerical)
SIGReg (population, numerical)
sliced KSD (population, numerical)
KSD (population, numerical)
MMD (population, numerical)
cov, real training loop
0.0
0.2
0.4
0.6
0.8
10^0
10^1
λ/λ^*



(b) cov arm: probe R^2 vs variance share
value
probe R^2 (population)
nuisance variance share
probe R^2, real loop
share, real loop
0.0
0.2
0.4
0.6
0.8
1.0
10^0
10^1
λ/λ^*
